

→ Cashless Solution

Cashless Catering

Schools, Universities, Education & Training, Corporations
 iTouch software is the ideal cashless catering system for any school or business that provides students or staff with a catering facility. iTouch's features have been designed specifically for the corporate and education markets to improve meal time administration and operational efficiency.

Our cashless solution greatly improves security and can also boost food sales, which means more profit is generated.

£ Cashless

An employee or student simply places their finger in the biometric vein reader, or swipes their card and, once successfully verified by the cashier, their account is debited. Accounts can be pre-paid automatically, topped up or debited from wages.

% Discounts & Meal Deals

iTouch POS allows you to easily configure meal deals, promotions and other discounts for automated price calculations, buy one get one free etc. It also allows 'happy hour' and 'early bird' pricing linked to particular dates, days and time periods.

Customer Tracking

Place delivery or collection orders by phone, web or mobile app allowing customers to pre-order for catering or queue busting. iTouch POS can be connected to your phone line and will capture the phone number of all incoming customer calls and allow users to place pre-orders for busy periods.

Speed of Service

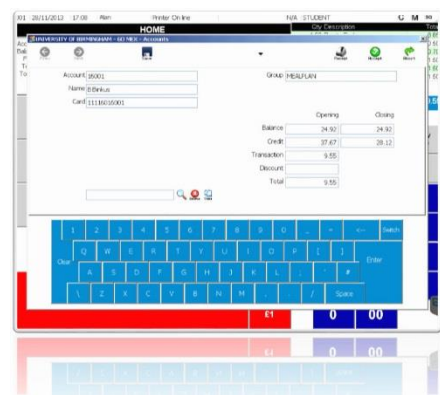

Canteens & cafeterias are fast-paced, cash rich environments. Speed of service and reliability are key in these high turnover environments, our EPOs software system facilitates excellent customer service even during the busiest trading periods.

Security

To ensure each operator is ringing up food & drinks under their own name, secure employee login cards, dallas keys or even biometric fingerprints can be used to identify staff members. Strong security features like these will help secure your cash and enable you to keep control of your business.

Real Time Reporting

Real-time reporting is available either at the EPOs terminal, Back Office PC or HeadOffice giving you and your management team key data about trading, staffing and stock information.
