

# Handheld

## iTouch Handhelds

iTouch handheld ordering can provide an average increase in turnover of 8.5%. The main reasons for increased turnover are:

- Saved time & increased efficiency
- Work is made easier throughout the entire restaurant
- Improved Service
- No food or beverages left of bills
- Savings in costs & personnel

Remote order printing automatically prints the orders from each point-of-sale terminal or handheld to the Kitchen or Dispense Bar, thereby improving customer service and increasing the efficiency of the waiting staff. iTouch will ensure every item you deliver to a table, appears on the customer's bill when they come to pay. These small savings can amount to huge savings over the months and year.

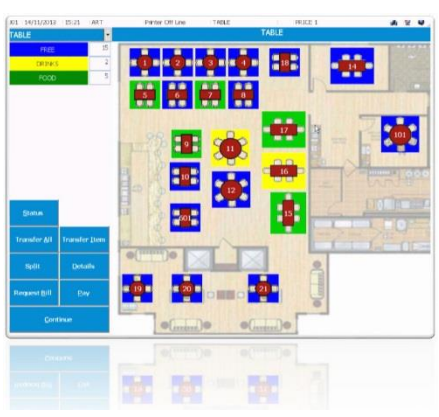

## Benefits

Just some of the many benefits include:

- Speeds up table turnovers and enables "Up-selling" at the table
- Eliminates manual paperwork
- Cuts down on operator errors
- Less fixed terminals and more cost efficient
- Easy-to-use, hand held, mobile and flexible
- One stop ordering process, no double entry required
- Cuts down on cabling
- Improves speed and efficiency
- Increase customer satisfaction
- Cuts down on operator errors
- Less fixed terminals and more cost efficient
- Easy-to-use, hand held, mobile and flexible
- One stop ordering process, no double entry required
- Cuts down on cabling
- Improves speed and efficiency
- Increase customer satisfaction
- Reduces server training time and costs
- Off the shelf hardware allows customers to choose any compatible device

The popularity of "off the shelf" wireless devices makes it easier to justify the business reasons for implementing applications using this technology. The introduction of inexpensive standard hardware now alleviates any adoption barriers that have existed due to the cost of these systems. Wireless communications are connecting people and information faster and more cost effectively than ever before.
