

Hotel Solution

Hotels & Venues

Hotels, Multi-property Chains, Guest Houses, Venues, Conference Centers

A point of sale system can provide important benefits to a hotel, helping to provide speedy transactions, accurate stock and security features that ensure you're receiving the correct amount of money for each transaction. iTouch is fast, intuitive and simple to use.

Our hotel solution provides speed and accuracy of ordering, ensures seamless processing of orders between the bar, dining room, kitchen and reception enhancing efficient hotel operations.

Accurate Bills

iTouch uses dispense printers and kitchen printers to make sure items are registered on your system before being served, this way you won't miss that bottle of wine or dessert off the bill again.

With links to property management systems including Protel PMS, you can be sure that every bill or product sold is charged directly to a customer's room.

Speed of Service

Bars are fast-paced, cash rich environments. Speed of service and reliability are key in these high turnover environments: whether it be a bar or a large venue, our EPOS software system facilitates excellent customer service even during the busiest trading periods.

Table Management

iTouch POS incorporates a large graphical table plan which can incorporate multiple levels if your restaurant has separate floors or areas.

Tables on the floor plan display their current status at a glance, is the table in use, which course are they on, have they requested a bill.

Security

To ensure each barman is ringing up drinks under their own name, secure employee login cards, dallas keys or even biometric fingerprints can be used to identify staff members. Strong security features like these will help secure your cash and enable you to keep control of your business.

Handheld Ordering

With iTouch mobile POS you can now enter customer orders anywhere- at the table, on your patio, in your beer garden or perhaps in your function & meeting rooms or hotel reception

Real Time Reporting

Real-time reporting is available either at the EPOS terminal, Back Office PC or HeadOffice giving you and your management team key data about trading, staffing and stock information.
