

Restaurant Solution

Restaurants

Fine Dining, Casual Dining, Pizzerias, Bistros, Hotels

A point of sale system can provide important benefits to a restaurant, helping to provide speedy transactions, accurate stock and security features that ensure you're receiving the correct amount of money for each transaction.

Restaurant touch screens provide speed and accuracy of ordering, increasing table turns and revenue, which help create seamless processing of orders between the bar, dining room and kitchen enhancing efficient restaurant operations.

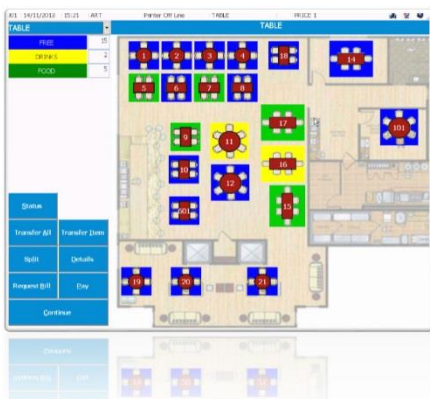

Table Management

iTouch POS incorporates a large graphical table plan which can incorporate multiple levels if your restaurant has separate floors or areas.

Tables on the floor plan display their current status at a glance, is the table in use, which course are they on, have they requested a bill.

Speed of Service

Bars are fast-paced, cash rich environments. Speed of service and reliability are key in these high turnover environments: whether it be a bar or a large venue, our EPOS software system facilitates excellent customer service even during the busiest trading periods.

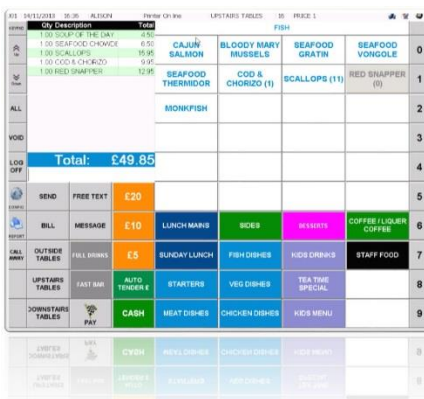

Accurate Bills

iTouch uses dispense printers and kitchen printers to make sure items are registered on your system before being served, this way you won't miss that bottle of wine or dessert off the bill again.

Security

To ensure each barman is ringing up drinks under their own name, secure employee login cards, dallas keys or even biometric fingerprints can be used to identify staff members. Strong security features like these will help secure your cash and enable you to keep control of your business.

Handheld Ordering

With iTouch mobile POS you can now enter customer orders anywhere- at the table, on your patio, in your beer garden or perhaps in your function & meeting rooms or hotel reception

Real Time Reporting

Real-time reporting is available either at the EPOS terminal, Back Office PC or HeadOffice giving you and your management team key data about trading, staffing and stock information.
