

Retail Solution

Retail

Shops, Convenience Stores, Grocers, Department Stores, Specialist Retailers

A point of sale system can save you time and money, increase productivity and assist in growing your business. iTouch is an end-to-end solution for retail outlets that helps improve customer service and maximise profitability.

Our Retail Solution has been specially designed to look after your sales, stock control and order management for both small and large-scale retailers

Accurate Pricing

iTouch provides accurate pricing, identifies loses, and provides efficient stock control.

Sales by code or barcode eliminates pricing errors, encourages optimum pricing and automatically applies special offers.

Promotions

Promotions give your customers another reason for coming back. Our integrated back office allows you to easily configure mix & match, promotions and other discounts for automated price calculations, buy one get one free etc. It also allows automated pricing linked to particular dates, days and time periods.

Chip & Pin

iTouch POS is securely integrated with Verifone to handle credit card transaction processing and ensures staff cannot type in a wrong value.

Verifones online portal allows merchants to review reports as well as historical & real-time transactions.

Speed of Service

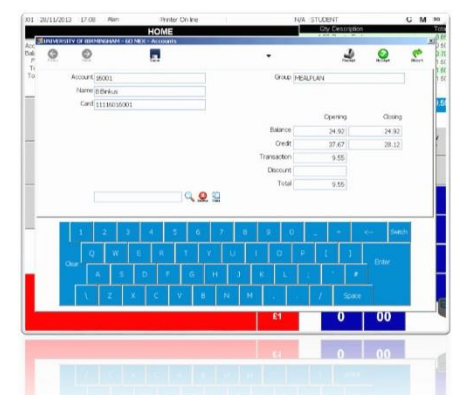

Retail outlets are fast-paced, cash rich environments. Speed of service and reliability are key in these high turnover environments: whether it be a corner shop or a large department store, our EPoS software system facilitates excellent customer service even during the busiest trading periods.

Security

To ensure each operator registers sales under their own name, secure employee login cards, dallas keys or even biometric fingerprints can be used to identify staff members. Strong security features like these will help secure your cash and enable you to keep control of your business.

Real Time Reporting

Real-time reporting is available either at the EPoS terminal, Back Office PC or HeadOffice giving you and your management team key data about trading, staffing and stock information.
